

Seed catalogue Bush Beans

'Combining over 40 years of experience with innovative technology gives us a leading edge in bean seed breeding'

Ferdi Veenstra, Area Sales Manager

Client first

We cherish our personal service, short lines and always put our customers interest first.

Sustainable growth

We export our vegetable seeds to over 100 countries around the world.

100% independent

We are one of the few family owned breeding companies in the Netherlands. Since 1956.

We focus on a limited number of crops in which we strive to be a top 3 player.

Passion for genetics

We innovate with a long term perspective, together with our clients.

Suitable for organic

* Recommended for processing market

Recommended for fresh market

We combine state-of-the-art innovations with our long term experience. In the spotlight.

Straight fleshy pods

is a high yielding variety in the fine segment. It produces compact strong plants with long uniform straight pods. It is a "clean pick" variety where harvested pods show a very nice cut due to the detachment at the joint.

is an XF bean for the processing market with good heat tolerance. It has shown a very good string tolerance during both the trial and the development stage. The pods are straight and have an attractive fresh green colour. Zanzibar is very uniform, keeps the caliber and picks clean.

Quality pods

is Medium Fine variety with a relatively dark color. The plant is very strong and it has a long harvest window. Suitable for processing as well as for fresh market.

Early yielder

is an early medium fine bean with a high percentage of clean pick for the processing and Fresh market. The pods are straight and uniform. Colour is medium green. The pod setting is very concentrated.

Early with stem, easy harvest

produces dark green pods with close to a 100% pick with stems. PV-875 is very early with good plant vigour. Bentley provides an erect plant with pods easy pick with close to 100% stem attachment. Produces 15-20 pods/plant under agryl, cold tolerant.

Straight and shelflife

is a very dark Medium Fine bean variety. It likes the heat and pods pick very easy and clean. Pods are about 15cm long and have an excellent taste.

Figures and information in this brochure are based on the average results of large scale plantings under European conditions and may vary with local environmental and agronomic conditions, grower skills, microclimate and soil structure. Resistance is the ability of a plant variety to restrict the growth and development of a specific pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure.

Pop Vriend Seeds does not accept liability based on the information in this brochure for deviating results in the cultivated product. Buyers and users of Pop Vriend Seeds varieties are responsible to determine suitability of the seeds to intended cultivation and local circumstances.
